WORK EXPERIENCE

Cognizant Technology Solutions - Senior Associate Feb 2023 - Present

- Led a 6-member team to architect enterprise-grade SaaS Micro-frontend solutions, designing high-performance UI component libraries from the ground up.
- Optimized Cloud UI performance, reducing bundle sizes by 20% and improving Core Web Vitals through advanced Webpack tuning and efficient memory management in complex event loops.
- Architected robust, production-grade Generative AI (RAG) applications; implemented text-streaming orchestration via WebSockets and managed complex asynchronous state layers with TanStack Query to handle sub-second model responses
- Practiced Agile-led quality governance, improving code quality by 20% via Husky-enforced CI checks, Jest and RTL testing suites.
- Spearheaded Technical recruitment for UI and Full-stack roles, conducting 100+ interviews at client and organization level.

Tata Consultancy Services - I.T Analyst Jan 2019 – Feb 2023

- Delivered end-to-end Full stack solutions utilizing React 16, Angular 8, Node.js 16 and Spring Boot 3.
- Mentored and upskilled a cohort of 20+ junior developers in modern UI frameworks and best practices
- Conducted 100+ technical interviews for Tier-1 banking clients (Citi), ensuring high-quality engineering standards.
- Reduced Angular project load time by 50% through optimization and upgrade (v5 to v8).

Unified Infotech Pvt. Ltd. - Application Developer May 2017 - Dec 2018

- Built Full-stack applications with Angular 5 and PHP frameworks (CakePHP, Laravel, Yii2).
- Acted as technical interviewer to hire over 50 associates and handled direct client communications.

S.D Softwares - PHP Developer Oct 2016 - May 2017

- Developed projects using Angular4, AngularJS, PHP frameworks.
- Trained freshers in HTML, CSS, JS, PHP.

ONEO Solutions - Web Developer Nov 2014 - Oct 2016

- Built projects using Angular2, AngularJS, PHP frameworks.
- Collaborated with stakeholders and Product owners through regular calls improving delivery time by 20%.

SKILLS

GenAI & Agentic Systems

LangChain, Multi-Agent Coordination, RAG, Vector DB (FAISS, ChromaDB), Claude Code, GitHub Copilot.

Frontend & UI Architecture

React JS, TypeScript, Next.js, Redux, React Query, HTML5/CSS3, SCSS, Responsive Design, Accessibility (a11y), Micro-frontend

Testing & Performance

Jest, React Testing Library (RTL), Mock Service Worker (MSW), Core Web Vitals, Performance Profiling, Memory Management, Bundle Optimization

Build & Tooling

Webpack, Vite, ESLint, Prettier, Husky

Back end & API

Node.js (Express.js), Python (FastAPI), PHP, REST, GraphQL, WebSockets

Databases

MySQL, MongoDB

DevOps & Cloud

Git, Docker, Jenkins, AWS

SDLC

Agile, Jira

KEY PROJECTS

Verizon - Auto Triaging Digital First

Lead UI Developer

Apr 2025 - Present

- Designed and led the **frontend development** for a platform that tracks order statuses across multiple Verizon applications to be used by front-line staff (support agents, managers).
- Created an intelligent workflow **automation engine** using **custom MCP servers**; automated the entire defect lifecycle by linking **Jira** issues to **GitLab** code modifications and MR creation, reducing manual root-cause analysis and remediation time by **50%**.
- Developed rich UI screens featuring interactive **billing summaries, charts and graphs** to visualize complex order checkout flows, reducing issue resolution time significantly.
- Built a responsive, real-time dashboard handling **high-frequency data updates** with centralized state management (**Redux + React Query**).
- Developed dashboards to **visualize order checkout flows**, improving error tracking and reducing issue resolution time.

Technologies: React.js 18, TypeScript, Redux, React Query, Tailwind CSS, AWS EC2, Systems Manager, Python, LangChain, HuggingFace, Ollama

CitiBank - Clarity Workflow Oversight (CWO)

MERN Stack Developer

May 2020 - Feb 2023

- Engineered a high-performance **Micro-frontend architecture** for global banking portals, ensuring seamless state management across complex, **multi-step transaction workflows** used by enterprise clients.
- Developed **NAV module** to load daily fund data from **third-party APIs (Saturn, CADIS)**, ensuring timely and accurate data ingestion.
- Implemented **role-based workflows** for fund NAV calculation and submission, enhancing process efficiency and compliance.

Technologies: React JS 17, Redux, GraphQL, Node.js, Express.js, Socket.io.

Cantor Fitzgerald - Prime Billing

Full Stack Developer

Jan 2019 - April 2020

- Built a **finance-driven daily calculation model** to lend money to clients by securing and evaluating asset quality.
- Built **Asset Billing sub-module** to update DB with calculated results.
- Enhanced the **CFS Billing sub-module**, a **role-based GUI** for benchmarks, spread data, approvals and reporting.

Technologies: Angular 8, HTML5, CSS3, Bootstrap 4, Java 8, Spring Boot, MSSQL.

Lystant

Full Stack Developer

Nov 2017 - Dec 2018

- Built a marketplace platform where sellers (individual/business) can **list items for sale**, and buyers can purchase via intermediaries.
- Enabled **Lystants** (assistants) to manage deals, pickup/delivery, and secure payments.

Technologies: Angular 6, HTML5, CSS3, Bootstrap 3, Node.js, MySQL

CERTIFICATIONS

Anthropic

- Claude Certified Architect – Foundation (CCA-F)

Amazon Web Services (AWS)

- Certified Solutions Architect – Associate (SAA)
- Certified Developer – Associate (DVA)
- Certified AI Practitioner (AIF)

AWARDS/ACHIEVEMENTS

Cognizant Cheers Award - Dare to Innovate

For increasing Verizon user-retention by 30% and decreasing CI/CD build time from 5 mins to 2 mins

Oct 2025

Cognizant Vibe Code Hackathon

Selected among Top 50 innovative ideas at Sub-Business unit level

Sept 2025

TCS Contextual Master

Awarded for customer dollar saving activity in Angular app

Jan 2021

EDUCATION

B.Tech in I.T

2009 - 2013

I.S.C (Higher secondary)

2007 - 2009

I.C.S.E (Secondary)

2006 - 2007
